

Trims and seals Extrusions

Integrate **Knowledge**
and Flexible **Solutions**

Custom fabrication:

- All our products are custom made to fit your specific needs and improve their performance in your application.

Cut length:

- Our extrusions can be cut to the required length to fit your needs.

Vulcanisation:

- It is also possible to cut and then vulcanise or glue extrusions according to length requested.

Adhesives:

- We use a wide range of PSAs. The choice of adhesive depends on the product selected for your application, the substrate on which it will be applied, the intended environment, and the degree of adhesion required.
